PROFILE

I believe in writing clean, semantic, and accessible code; although sometimes difficult to get right, I love the challenges and rewards coding brings.

My passion for the web industry extends well beyond my job, I have used the skills and disciplines learned to develop myself personally, develop confidence in my ideas, and push my comfort levels.

Going forward I aim to develop my technical ability in complex programming languages such as JavaScript, Python and PHP.

I hold a full, clean UK driving licence and own my own car.

EMPLOYMENT

FRONT-END DEVELOPER

WARWICK
2014-2017

NETNAK LTD

I started Netnak as an apprentice having never worked in the web industry. My initial responsibilities included maintaining existing client websites, building a professional relationship with them and learning how to use the companies custom legacy CMS.

Since being given a full time position my main duties have been in becoming Netnak's Statamic 'expert'. Having built close to 20 sites across 2 versions of the flat-file cms I have become very adept at building quick greyboxing sites, designing fieldsets for client data entry, using add-ons, building complex enrolment forms, e-commerce and even attempting to push the cms to it's limits by building a CRM as a side project.

From an early stage in my career with Netnak I was given the responsibility to work close with clients of medium/large size to discuss designs, needs, and to solve problems they might not have thought of. More recently I have begun to develop my own designs for local schools, events management sites and a band.

Netnak has exposed me to many different environments:

- * HTML5
- * CSS3
- * SASS/SCSS
- * Git
- * Laravel Forge
- * Statamic V1 & V2
- * Squarespace
- * Some Wordpress
- * Some Jekyll
- * Some Javascript
- * Laravel Valet
- * Photoshop
- * Illustrator
- * Adobe XD
- * Balsamiq
- * Basic email support
- * Inuit framework
- * Approach to coding & progressive enhancement

OUTLANDISH GAMING LOUNGE

Developed and led Rugby's first gaming lounge, a dedicated environment for video game enthusiasts to rent equipment on which to play and socialise with friends. Specialising in birthday parties, tournaments and all night gaming marathons. It provided a valuable community service for ages 8-27.
